### Important Information

Securities investments are not bank deposits and involve risks, including the possible loss of the principal amount invested. The price of securities can and does fluctuate; sometimes dramatically, and that any individual security may experience upward or downward movements, and may even become valueless. Therefore it is as likely that losses will be incurred rather than profit made as a result of buying and selling securities. This is the risk that customers should be prepared to accept. Investors investing in securities denominated in non-local currency should be aware of the risk of exchange rate fluctuations that may cause a loss of principal. Citibank is not recommending the Citibank Brokerage Account or giving any advice in relation to customers' securities investments. Customers will take complete responsibility for any losses resulting from their trading strategy. Investment products and services are not available to U.S. Persons.

Interested investors should seek the advice of their financial advisors, as appropriate. In the event that you choose not to seek advice from a financial advisor, you should carefully consider whether securities investments are suitable for you in light of your investment objectives, financial means and risk profile.
